

Saving your film and sending it in

What formats do films need to be saved in?

We need all films to be posted in on CD / DVD in any of the following formats: asf, asx, avi, divx, dv, dvx, m4v, mov, mp4, mpeg, mpg, qt, wmv, 3g2, 3gp, 3ivx and 3vx.

Burning your film onto CD/DVD

Roxio or Nero are good CD / DVD burning packages that often come included when you purchase a computer. You can also find a lot of DVD making and burning software here: <http://protectedsoft.com/products.php>. There are lots of free packages and free trial downloads which are quick and easy to download. *

Still having problems? Computer got a bug that's bugging you? E-mail our team at info@familyfriendlyfilmfestival.org.uk with any extra questions or for additional Movie Making hints and tips and we'll try to help! Or find us on Twitter @4FFilmFest

**please note that all software packages and other materials from external websites are downloaded at your own risk and not the responsibility of the Family Friendly Film Festival*

Sending in your film

Save your film onto CD or DVD and post it to us at:
